

Assignment 1

Observability in the Wild

Arquitetura de Sistemas
2025/2026

Problem & Architecture

Problem and Flow

- nopCommerce is a popular e-commerce platform
 - But it has no way to observe what is happening
- Customer places an order
 - PII Risk Management
 - Most critical area of the platform

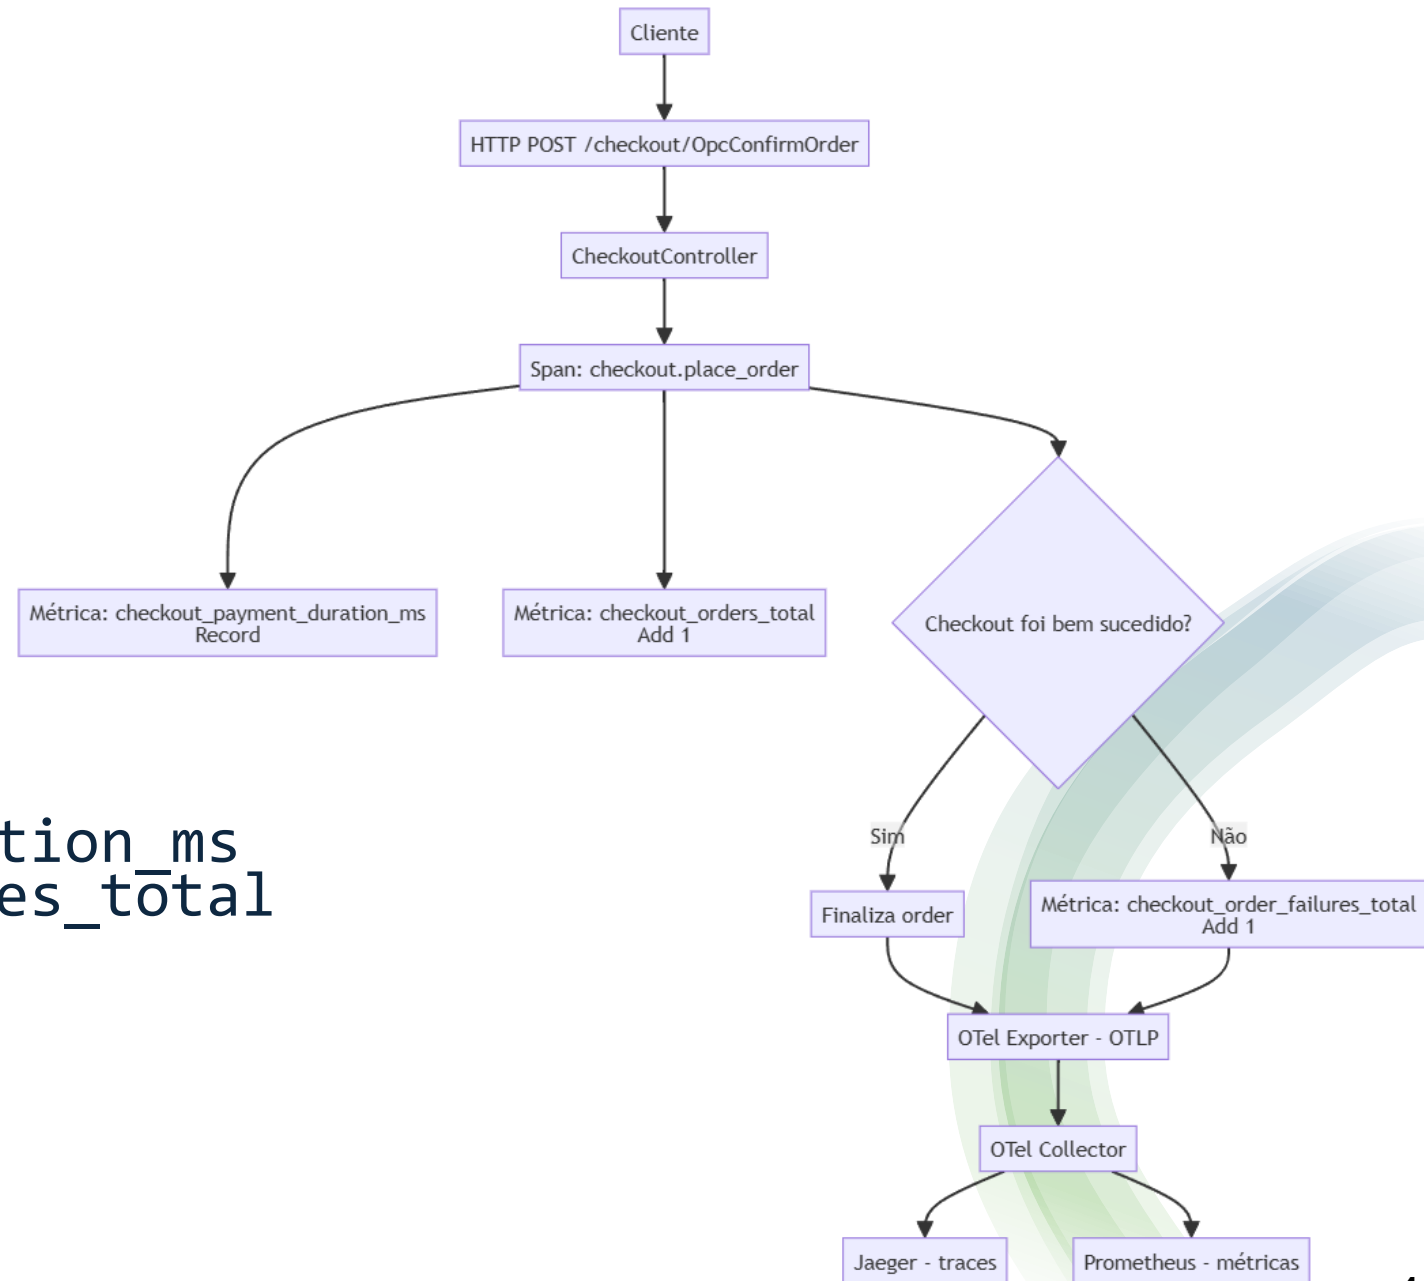

Used Spans and Metrics

Spans

checkout.place_order

Metrics

checkout_orders_total
checkout_payment_duration_ms
checkout_order_failures_total

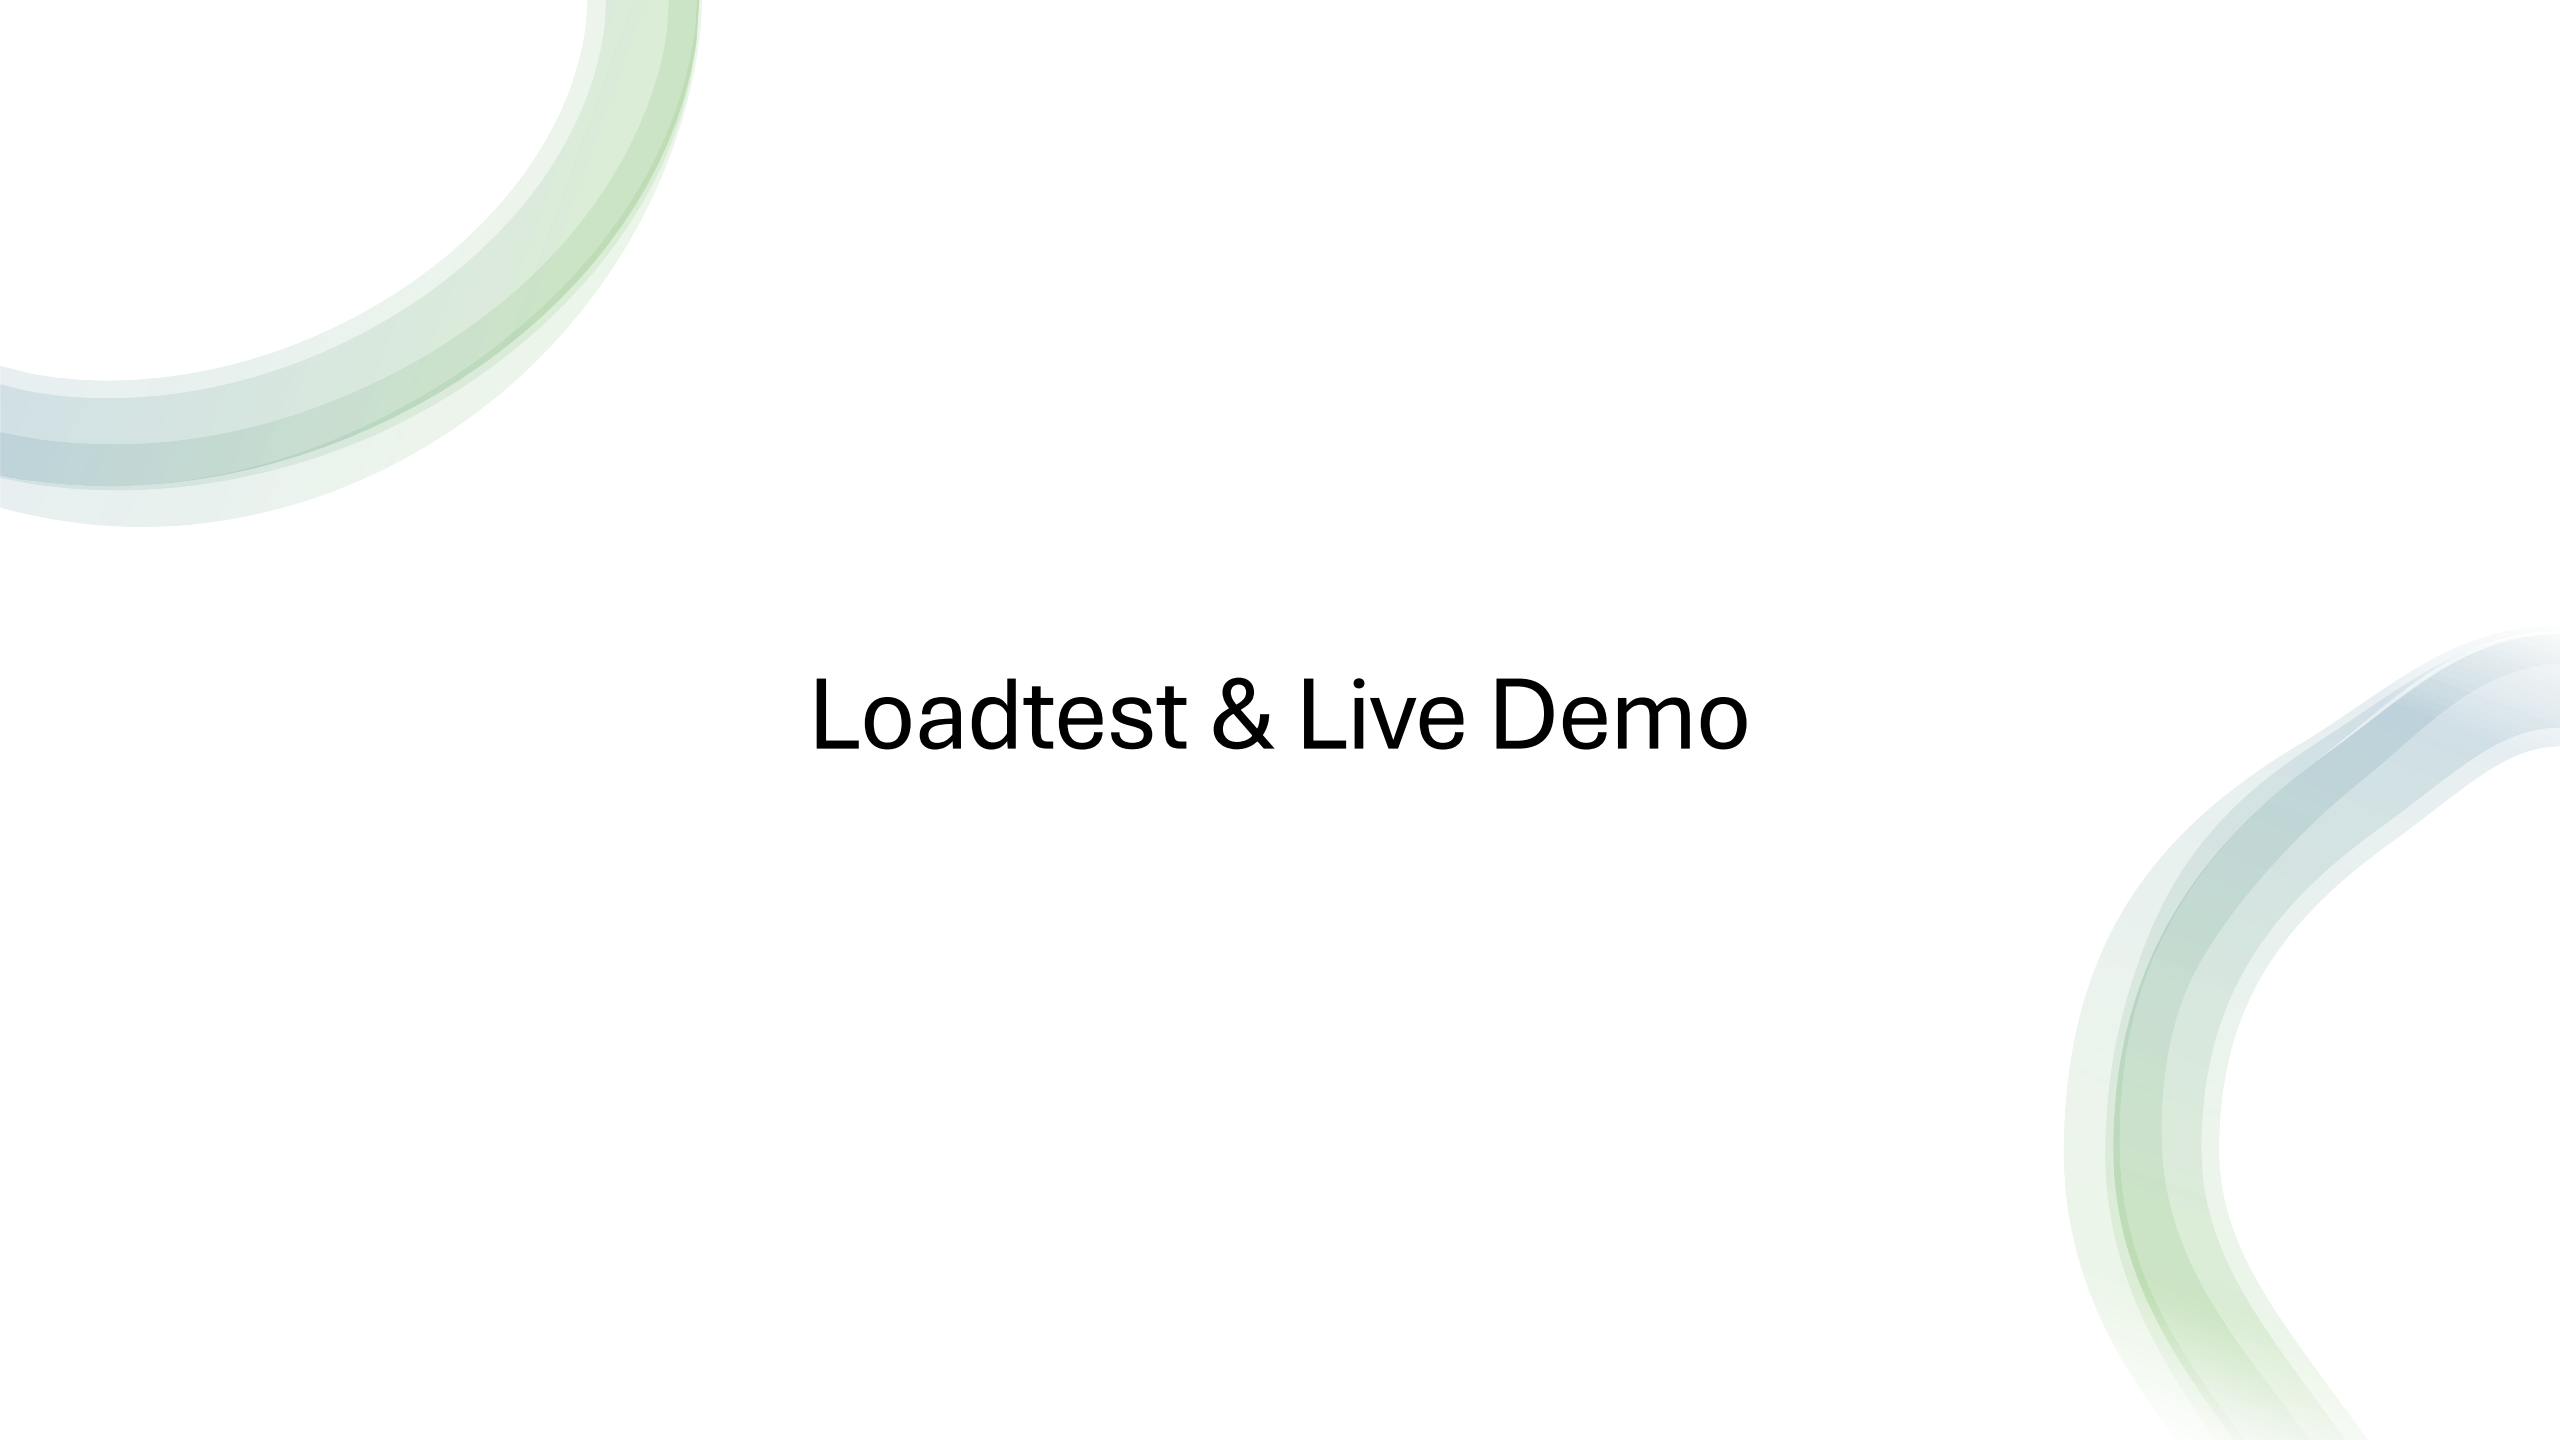

PII

Some omitted elements: name, email, phone, address, payment

Elements not omitted: order id, product id

PII excluded at SDK level, before sending to the collector

Considered excluding from database and collector

Loadtest & Live Demo

Loadtest

- k6
- Stage 1: Ramp up
 - 30 seconds
 - 0 – 8 VUs
- Stage 2: Sustained load
 - 1 minute
 - 8 VUs
- Stage 3: Ramp down
 - 30 seconds
 - 8 – 0 VUs
